

Self-Care Guide

Self-care during menstruation helps ease cramps, fatigue, and mood changes. These tips support your physical and emotional wellbeing.

- Stay hydrated with water and herbal teas.
- Eat iron-rich foods like leafy greens and beans.
- Use warmth to soothe cramps and take breaks when needed.
- Avoid heavy lifting; choose gentle movement like walking.
- Rest if you feel tired, and speak with a health provider for severe pain.

A small routine can make your period more comfortable and empowering.
